How HCX works

It's fun, easy, and takes only a few minutes!

modules / STO / ISTO.sol

modules / STO / ISTO.sol This is an interface to be implemented by all STO modules. This contract is used to verify the investment, whether the investor provide the allowance to the STO or not

contracts / interfaces / IST20.sol

This is an interface for the ST20 Security Token standard. It mints new tokens and assigns them to the target investor. It also enables a Burn function used to burn the securityToken.

contracts / SecurityTokenRegistry.sol

Registry contract for issuers to register their security tokens. Creates a new Security Token and saves it to the registry. You can add a new custom Security Token (Token should follow the ISecurityToken interface) and save it to the registry

About us

Founder Arifa Khan of Himalaya Labs

BLOCKCHAIN & ICO FEST '17

October 26-27, 2017, Istanbul

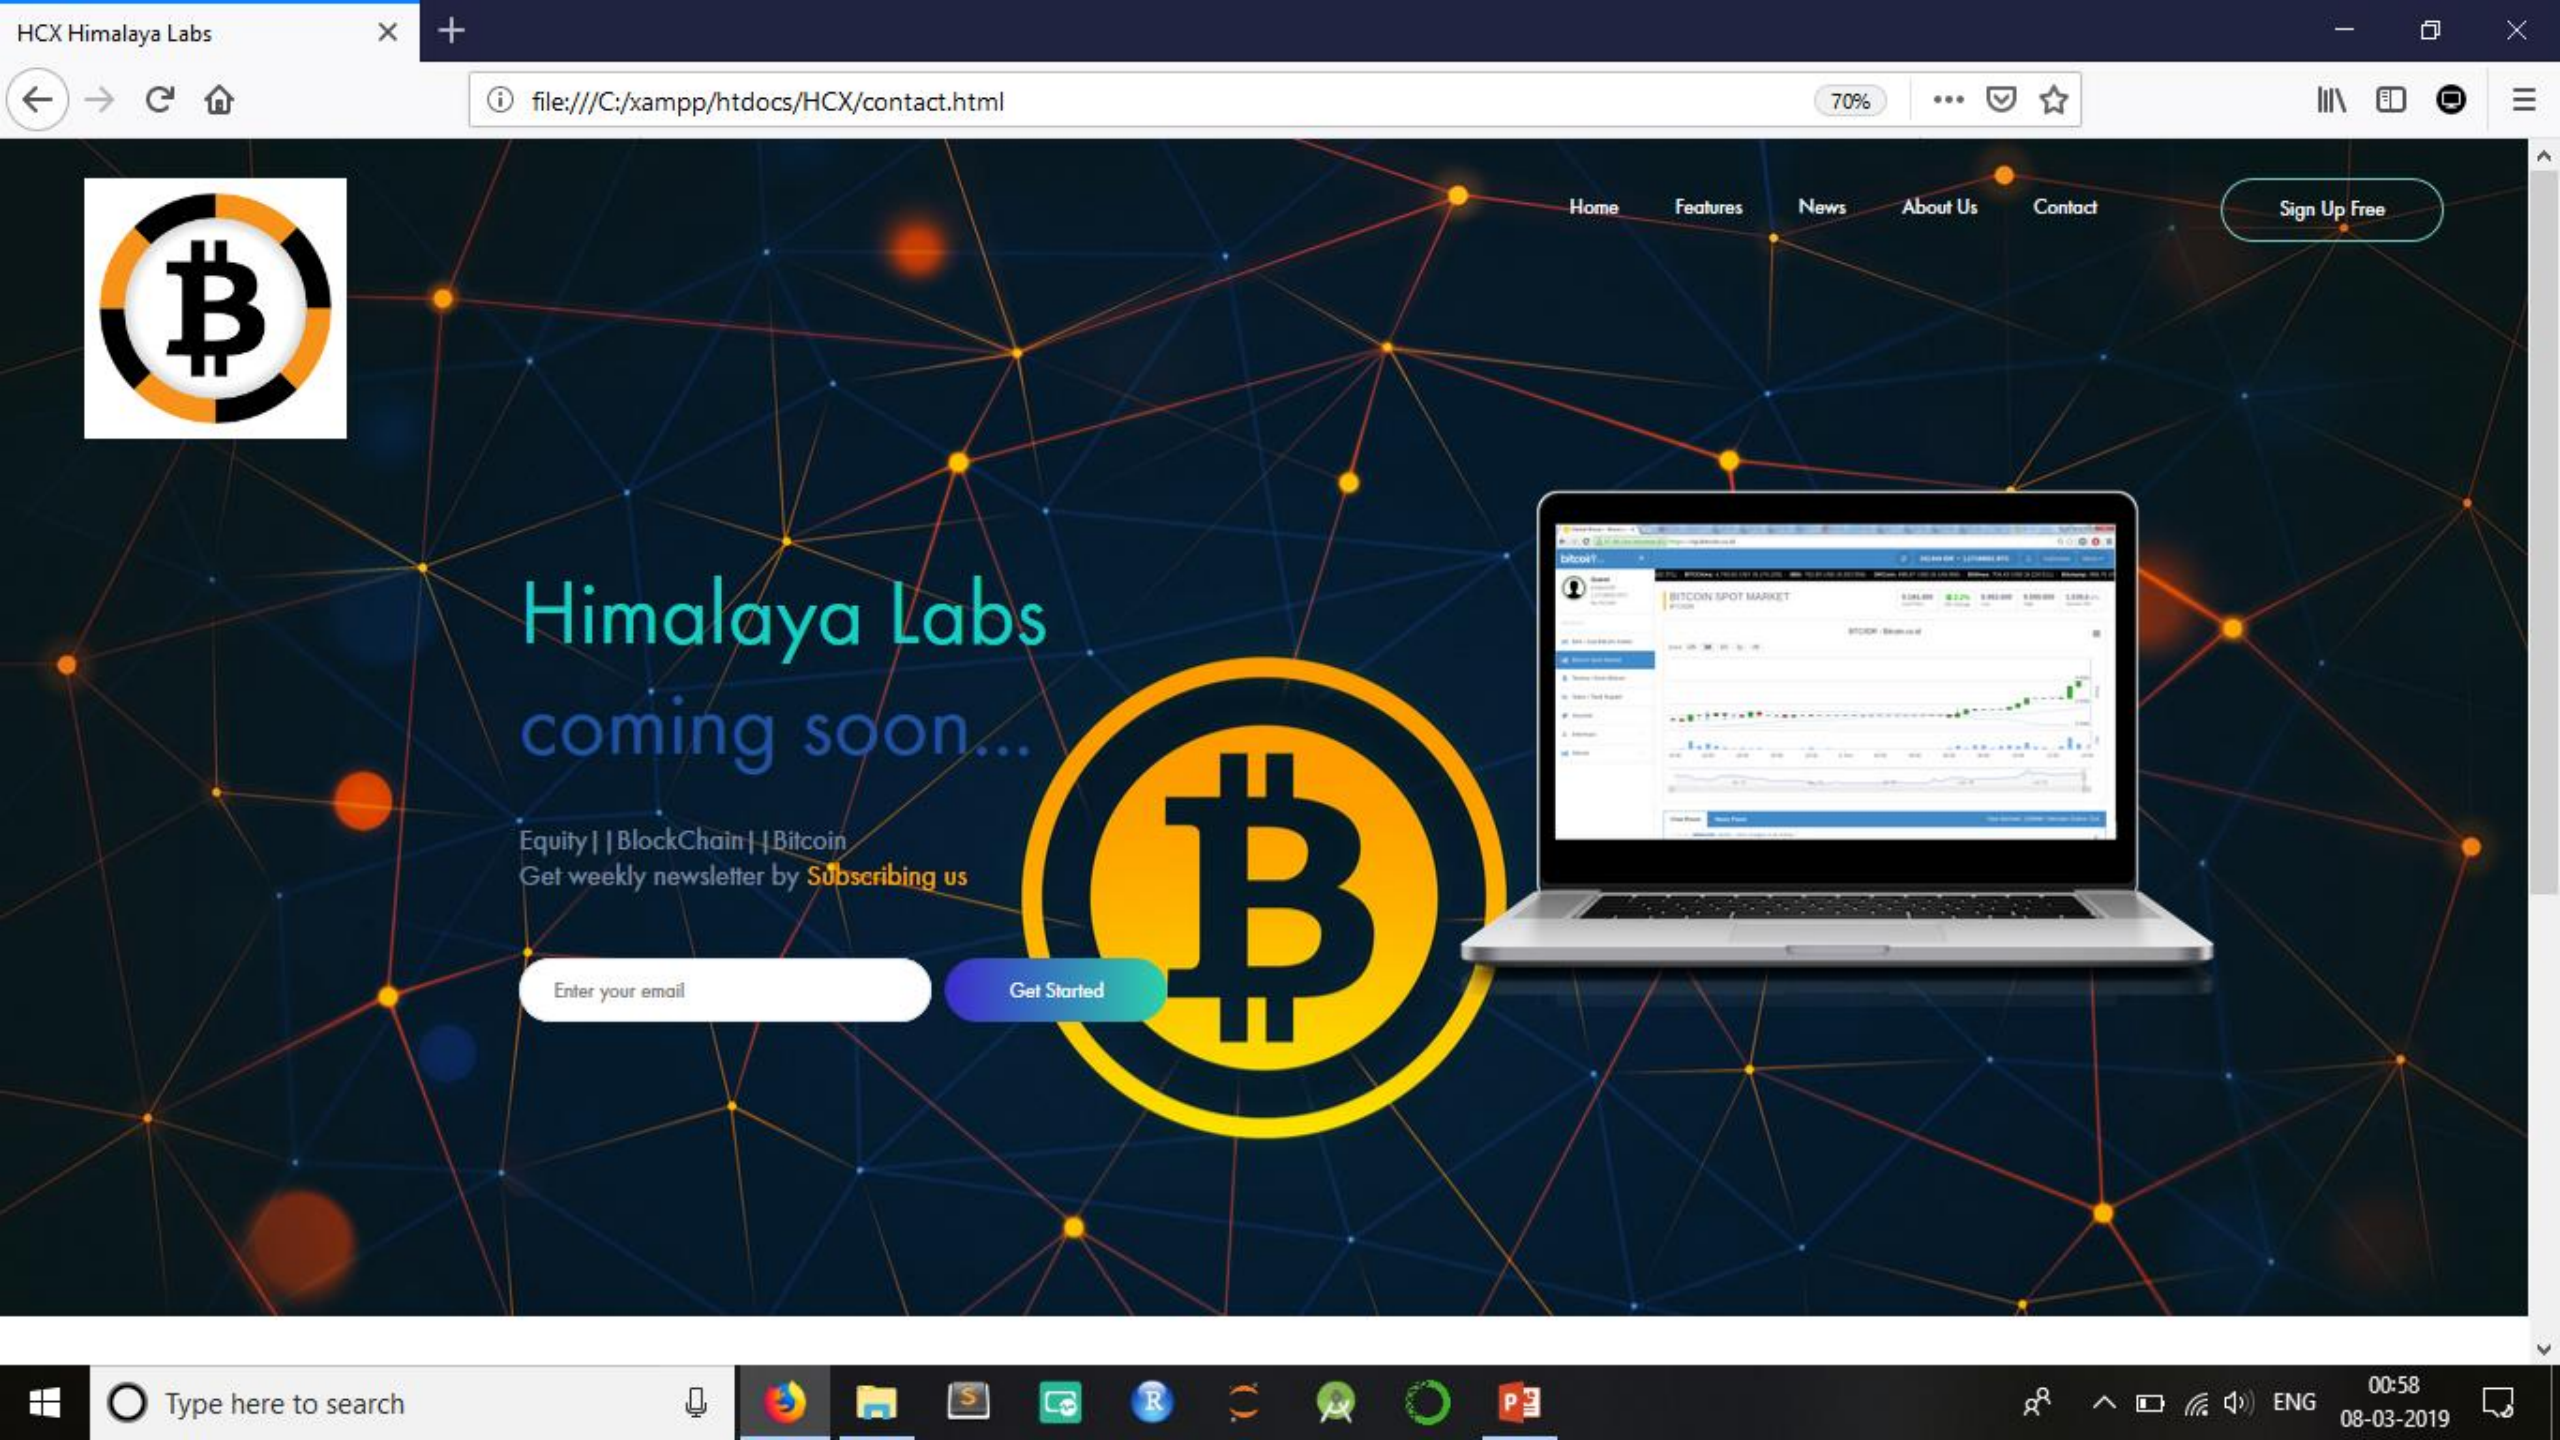

Arifa Khan
Founder & CEO
Himalaya Labs

Financial Services, Settlement Networks

Arifa Khan is India Partner of the Ethereum Foundation. She has been researching the blockchain space since 2015 and is a distributed ledger technology evangelist. She is currently leading efforts to build a ground-breaking decentralised solution for capital markets (DGCAMP) as Founder & CEO of Himalaya Labs, which she considers her most inspired and important work to date.
